SUPPORTING YOU

WELCOME

Welcome to your Morrisby career analysis.

Whether you are just beginning to consider career or study options, or you are looking for a change in career, we are here to inspire and help you realise your potential.

This report is the beginning of your journey with us. Everything in this document is personalised to you and based on what we have found out about you so far. At any time, you can log in to your personal area on our website, re-visit your results, research the pathways into careers, investigate job specific information and also search for courses and research apprenticeships.

When reading this report, please remember that we are not here to tell you what to do, but to give you the tools and information to support you in making the right decisions for you.

LOG-IN FOR LIFE

No two people are exactly the same. Because tastes, preferences and the things that motivate and inspire us can change over time, you have a log-in to Morrisby Online for life. This means that you can come back at any time in the future to investigate different options and we can be there to support you at all of the important educational and career decisions you will need to make.

ABOUT US

Deciding on a career is not easy. Understanding the options available to you in the first place is hard enough, but then working out what you are best suited to, and how you can achieve your goals, is difficult.

With our expert analysis, we can help to make your journey easier by giving you the tools to aid your decision making.

- Established in 1967, we are world leading developers of Careers guidance systems and services.
- Experienced providers of matrix accredited and ISO quality assured Careers information, advice and guidance.
- British Psychological Society Registered

USING THIS ANALYSIS

INTRODUCTION

When you took your Morrisby Online assessments, we measured your verbal, numerical and abstract aptitudes. We also took a subjective snapshot of your interests, preferences, talents and motivations.

We then analysed all of your results, which were presented to you on our website. This report is a summary of what you have seen on the website so far. In addition to this report, your own personal webspace also features:

- Career & subject suggestions
- College & university search
- Thousands of links to videos, case studies & further information on careers & subjects
- Different routes into careers including salary information

All of the results and recommendations are available both in this report and in a dynamic and interactive format on our website.

Every time you make a change to your preferences on Morrisby Online, this report will update and you can download it again.

IMPORTANT

We want this analysis to help inform and support your decisions for the future. As with all assessments, the results reflect your performance and feelings on the day. We hope and expect these to be accurate, but on occasions, people do not perform as well as they should. If you feel that your results are not a true reflection of you, please talk it over with a careers adviser.

APTITUDES

YOUR APTITUDES

The first assessments you took measured your verbal, numerical and abstract reasoning. Your results have been analysed and compared with others of a similar age to you. Please remember that this is not about measuring individual scores, but understanding where your relative strengths lie.

We use this information to build a picture of you and to identify your potential. This profile also informs your career suggestions.

VERBAL, NUMERICAL & ABSTRACT

Your high abstract result, lower numerical and verbal results suggest that you might prefer working with real objects, diagrams, plans and quantitative analysis. These are useful skills for engineering, technology and some commercial areas. You may prefer learning from charts, models, videos and your own experiences rather than just from books or lectures. You could look at careers which match this pattern, such as science and laboratory work, technical design, surveying, engineering, as well as working with computers and data processing and many commercial careers such as banking, insurance, finance and so on.

SPATIAL AND MECHANICAL

Your score on the spatial assessment was above average but a little lower on the mechanical. Whilst you can cope with the mechanical principles of machinery and everyday living, it's not your strongest skill. You have plenty of practical ability for everyday life and for the great majority of jobs. There may be a few highly practical areas that you could find a little laborious.

APTITUDES - WHAT IS BEING MEASURED?

VERBAL

This assessment measured the ability to use words and indicates potential in dealing with verbal information, whether written or spoken. High scores can indicate a comfort in reading, writing, and speaking. Careers which need this ability include teaching, law, journalism and sales. Can also indicate a preference for learning in a traditional way, using books and attending lectures.

NUMERICAL

This measured the comfort or intuitive insight when using numbers or data. High scorers often tend to be more logical or organised, with a preference for weighing up the pros and cons of a situation. They may also be less interested in compassionate or caring professions. A high numerical score would indicate a preference for work with numbers in commercial fields, such as accountancy, sales, insurance banking and finance.

ABSTRACT

This assessment measured the ability to deal with complex problems. This indicates a preference for dealing with real things and visual information such as charts, diagrams and pictures. High scorers often 'see' relationships between things and will learn by doing and observing, rather than talking. Such people would be more comfortable with demonstrations, rather than a traditional, book-based approach to learning. This ability is also linked with many technological and scientific areas, and therefore can be associated with engineering, research and development, design and information technology.

SPATIAL

Designed to measure spatial ability. This facility is useful for occupations or activities where visual-spatial skills are important, such as design, engineering and electrical work. It is also useful for tasks that involve the appreciation of plans, diagrams and flow-charts. High scorers may also feel comfortable when dealing with the overall plan of a project rather than the details.

MECHANICAL

Designed to measure the ability to appreciate and solve mechanical problems. It does not rely on specialist knowledge, although it does require an ability in solving straight-forward practical problems, and an understanding of how things work and are put together. It is therefore useful for engineering and technical careers. High scorers may feel comfortable when dealing with the details of a plan, and may adopt a step by step approach to tackling projects.

INTERESTS

INTRODUCTION

This section examines the findings from the Aspirations Questionnaire. This asked you about your career interests, your talents and any preferences you might have about your work environment, the type of organisation or your role within it. Your results are shown and described on the following five pages. On the website you will also find a breakdown showing how well your results support working in each of 49 different career areas.

YOUR INTERESTS

We asked you questions about your attitude to working with people, information and things and how important each one was to you. You can see the results below. Remember, this is based on what you told us and you can amend your responses at any time.

YOU

- Advising
- Instructing
- Scientific
- Researching
- Caring
- Supportive
- Persuading
- Influencing
- Commerce
- Analysing

People

Information

Things

You are most interested in a career path where you help other people to get the most out of their lives. This includes education in the broadest sense, counselling, advice and guidance. You would enjoy helping people to achieve their true potential. The results suggest that you might also enjoy scientific methods and research. In the purest sense this might be physics, chemistry or biological research but you also need to remember computer science, forensics, materials, geology, meteorology, psychology and many others, all of which rely on the scientific method.

INTERESTS

Additionally you appear interested in a career where you care for other people on a daily basis. Perhaps young children, or the elderly or others who for some reason or another need help in looking after themselves. Additionally you might consider the types of career where you would be working with people in a professional, rather than personal manner. You would enjoy guiding them to make the best decisions. This might include management, sales, politics, marketing, advertising, broadcasting and many others. You also show some interest in a career dealing with numerical records and quantitative analysis. This often means working in commerce or finance; banking, insurance, trading and brokerage, risk analysis and accountancy. However, all organisations require some numerical analysis so it's an area with many and varied opportunities.

The results show that you are not interested in spending your time writing or working with the written work or verbal communication. You would also like to avoid working in IT, centering on screen-based activities, programming, data analysis, hardware and the like. Similarly you would like to avoid working in a directly practical area; jobs which involve making, maintaining or moving physical objects. Neither do you seem keen on a career working as an artist or designer, where success is dependent upon the aesthetic quality of the item you create.

SPECIAL TALENTS

We also asked you about any special talents you might have. These may form an important part of your career choice, or you might prefer to keep them separate to your job. You can decide on how much they should influence your career suggestions by using the career mixer on the website.

 Sport

Of the five areas (music, sport, performing arts, languages, art & design) you are most interested in sport. You are not interested in music, languages or performing arts.

WORK STYLE

WORK STYLE

YOU

Determined
 Industrious
 Ambitious
 Purposeful
 Smaller company
 Independent

Here we are looking at how you go about solving problems, what motivates you and how you like to work. The graphs below are based on what you have told us so far.

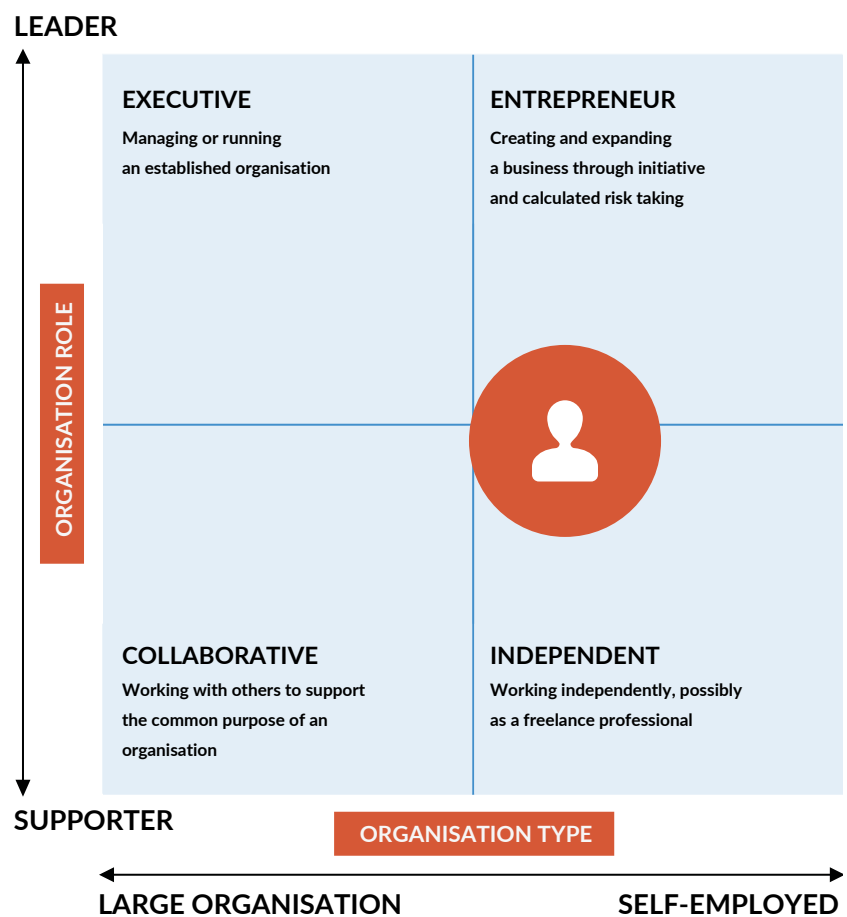

You want to succeed and are likely to set yourself very ambitious targets. It is important for you to achieve your goals and you want to work in an area where you can personally make a real difference. You appear industrious and are prepared to put in a good deal of effort to achieve your goals. There is a risk that your work-life balance could tend to be too much on the 'work' side but you are likely to achieve a great deal. Your answers suggest that you very much like to make your own decisions and do things the way you want. You wouldn't like to be continually told what to do by a manager or supervisor. Perhaps you see yourself working independently - perhaps working for yourself, or developing a portfolio career. Independence is a very useful trait, but you might find it frustrating to be part of a big group with little autonomy. However you'll probably have to put up with it, whilst you develop your skills and gain the experience you'll need later on.

Providing you felt comfortable with the work you would be prepared to be the leader within a group of people. You could take responsibility for the actions of others and might want to consider careers where you assist or advise others on what to do. You like to work in your own way and would prefer a career that offered variety and the opportunity to do things as you see best rather than following a set procedure.

WORK STYLE

ORGANISATIONAL ROLE

This graph shows the type of organisation and role that you aspire to. We work this out by looking at your preferred role in an organisation (from team member to leader) and comparing it with the type of organisation you want to work in (from a large multi-national, to working for yourself) You may find that these attitudes can change over time, remember, you can update the results by re-taking the aspirations questionnaire.

You appear happy to take the responsibility of working in a small organisation or even working independently. You don't need the protection of massive company. Happy to take the lead when required, but equally content as a team player.

WORKPLACE

WORK ENVIRONMENT

YOU

Meeting People
Nice Surroundings
With the Public
Non-physical

This is what you told us about where you would most like to work; whether you prefer the idea of being inside or outside and how important it is to you to work alone or with others.

Regarding workplace, you like the idea of a comfortable, well-equipped building where you can meet new people frequently. You don't like the idea of being stuck away on your own in an office and nor do you want to be outside in all weathers. There are many careers with many employers which will provide this combination.

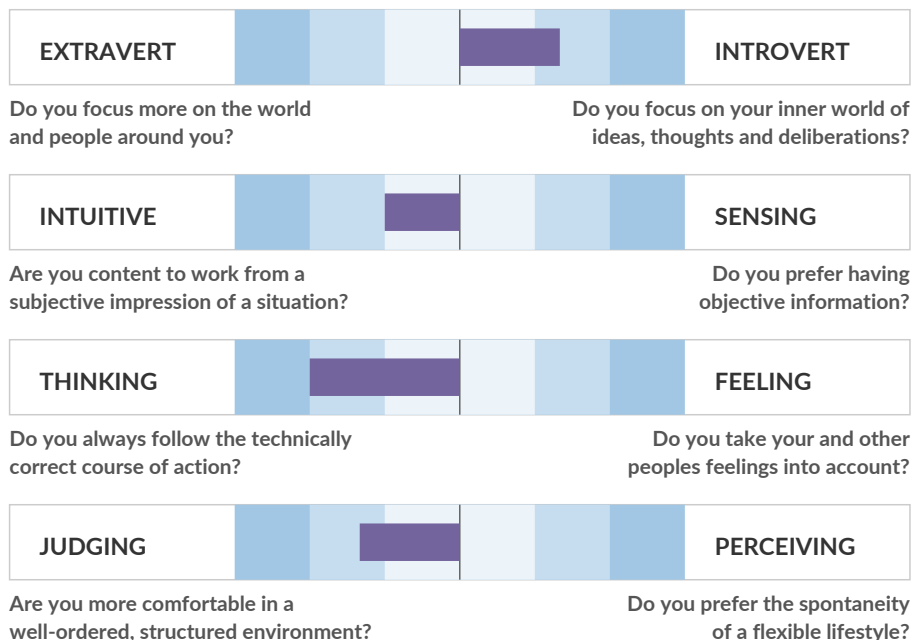

PERSONALITY

YOUR PERSONALITY TYPE

SCIENTIST

Pragmatic
Rational
Logical
Independent
Insightful
Reasoned

Personality describes the way we think, feel and behave - in short, it is what makes us unique. When considering careers, we often think about having the right skills and qualifications, but having the right personal qualities can be just as important. Our personality type, and the way we act and behave will influence our suitability for some careers more than others. This profile also informs your career suggestions.

Independent, innovative and insightful but potentially a little hard to please. Theoretical in outlook with a strategic, logical approach with a scientific methodology. Self-assured, ambitious, organised and likely to expect high standards from self and others.

When you make decisions you prefer to adopt an analytical approach, and work out the most logical solution to a problem. Whilst you accept that not all decisions can be made objectively you are keen to find the technically correct solution even if it will not be received well by others.

You would prefer a well ordered and structured lifestyle. Whilst you enjoy occasional surprises, you prefer the important things in life to be well thought through, organised and as definite as possible. Some things need to be planned well in advance to ensure you get the most out of them.

Also of importance is your introversion result. Whilst sociable, you seem content with your own company and are happy to work on projects independently. Perhaps you might seem reflective and a little reserved to others. You don't seek out an audience for your activities but enjoy joining in with others. You show a preference for developing ideas, mentally exploring new possibilities and breaking with tradition. You are keen to use your imagination and are comfortable in the worlds of art, literature and emotions.

THE JOURNEY AHEAD

INTRODUCTION

This next section of your report is all about looking to the future. We have assessed and analysed your talents and abilities and now it is up to you to decide how you want to use them.

You will now see a summary of the careers, subjects and options that you have shortlisted and also the ones that we recommended to you. You can go back to the website at any time to update or change these. Each time you do so, this report will update.

Remember, none of this is set in stone. You can re-visit the website whenever you like, to research study and career options or to update the answers to your questionnaires.

THE JOURNEY AHEAD

CAREER SUGGESTIONS

The career suggestions that you are about to see have been selected from a list of over 600 occupations. We have short-listed them for you because they match your particular abilities and interests.

These are not the only jobs for you to think about. You may have other career ideas that you want to investigate. You can easily do this by visiting our website. Once you add a career to your favourites, it will show up on this report.

SUBJECT SUGGESTIONS

The subject suggestions are made based on your results on the various questionnaire and assessments but are also graded according to how useful they would be for the suggested careers and any careers which you have favoured. Ideally these will be subject suggestions which both enable your intended career path(s) and which you will find interesting and well suited to your make-up. But sometimes compromises have to be made and if there is a conflict between needing to study a subject to enter your chosen career and your interest or ability to do well in that subject, then it might be best to speak with an Adviser.

USING THE CAREER MIXER

Our career recommendations have all been made by measuring many different factors about you, including your talents, working preferences, aptitudes, personality and working style. Some of these may be more important to you than others. On the website, you use the mixer to rate each of these individually to tell us how much we should take them into account when making our suggestions. You can re-visit this at any time.

You can also use the career mixer to decide how far you want to take your studies. Career suggestions will be amended accordingly.

FINDING COURSES

You have access to a large database of university & college courses. You can search by location or course and start to build a shortlist.

If you have added any courses to your favourites, you will see them below.

CAREER SUGGESTIONS

CAREER SUGGESTIONS

Rating	Career
	Pharmacist
	Sports scientist
	Optometrist

	Nursing and healthcare

CHOICES

CONSIDERING EDUCATION

16-18 Choices

Choosing school examination subjects are some of the most important decisions you will make about your education, as they can impact your future career and the choices available to you.

Try to choose subjects that:

- You find interesting and enjoyable so that you can complete the course
- You are good at and that suit your style of learning
- Fit into your future plans.

If in any doubt, you should speak to your school.

18+ Choices

Choosing whether to go straight into employment, take the apprenticeship route or go into higher education can be a difficult decision to make. Higher education is a huge investment in both time and money. If you are choosing this route, be sure that:

- You choose a course that you are good at, you find interesting and that you can do well in
- You choose a university that suits you and your learning style
- The degree fits in with your future and your career aspirations.

FINDING COURSES

There is a comprehensive database of universities & colleges on our website.

If you are interested in pursuing the apprenticeship route, you can investigate these options on our website.

CHOICES

CHOOSING A CAREER

Throughout this process, we have looked at your aptitudes, aspirations and certain aspects of your personality to suggest and help you discover the different career options available to you. Your career and your future are now in your hands.

Deciding on a career is one of the most important decisions you will ever have to make, so you need to know as much as possible about yourself, about possible careers and how to go about entering them. After interacting with our website and reading this report and perhaps talking it over with your family and careers adviser, you are probably now aware of where your greatest strengths lie and how they fit in with your interests.

You may need to take action soon, such as deciding on subject choices or whether to pursue further study or a more vocational college course, or apprenticeship. If you are considering subject choices, it is important to make sure that you do not shut off too many options at this point, by dropping subjects which would be essential for a career you are still considering.

We hope that you have enjoyed this process with us and that you have found it to be a thought provoking experience. Do remember that you can log in to our website at any time to return to your results, re-take your aspirations questionnaire and investigate different career options.

INTERVIEW NOTES

Ann completed the Morrisby Assessments on 19 June 2017. These notes are drawn from our discussions on 08 September 2017.

Situation

You are currently in Year 11 and need to consider A-Levels and to discuss career options.

Background

You enjoy playing a range of different sports at school but don't have any sporting career aspirations.

Key Findings

The high abstract result, lower numerical and verbal results suggest working with real objects, diagrams, analysis (technology, science). Could consider areas such as science and laboratory work, technical design, surveying, engineering, as well as working with computers and data processing and many commercial careers such as banking, insurance, finance and so on. The score on the spatial was above average but a little lower on the mechanical. Can cope with mechanical principles but it's not a particularly strong skill. Has plenty of practical ability for everyday life but there may be a few highly practical areas that might find laborious.

Your main career interests: advising and science.

You are also interested in: caring, persuading and numerical.

Skill-based talents: sport.

Workplace: with the public and comfortable.

Work style: determined, purposeful, independent, leader, creative.

Personality Style: The Scientist

Assessment Review

You felt that the assessments gave a generally accurate description. You were pleased that the pattern of your aptitude scores matches with your strong preference for working in a science-related field. We discussed the fact that you made quite a few errors on the verbal tests - you felt that you had understood the questions and that the score is probably accurate. You know that you prefer to learn by observing rather than by reading and acquiring knowledge so the lower verbal result makes sense to you.

INTERVIEW NOTES

Top 5 career suggestions

Pharmacist
Sport and exercise scientist
Biomedical scientist
Optometrist
Audiologist

Qualifications

- A-Levels - Considering: Chemistry, Physics, Mathematics and Psychology. We discussed your proposed combination of science subjects at A level. In general the subjects you are considering could lead to a range of healthcare degree courses. You are quite adamant that you prefer Physics to Biology. However, be aware that the lack of Biology A level may reduce the number of institutions you could apply to for some of the healthcare degree subjects. Before making your final choice of A level subjects you may wish to check out subject-specific entry requirements for different degree courses on the UCAS website www.ucas.com.
- 18+ - Considering: a university degree but haven't decided on the degree subject yet.

Career Possibilities

You have favoured Optometrist, Pharmacist, Pharmacologist, and Clinical Psychologist. You are not sure yet about your future career path but you liked these careers as they combine your interest in science with your concern for making a difference in other people's lives. You had considered Pharmacist before taking this assessment but were pleased to have some healthcare alternatives to consider as well. Your older sister is studying Medicine and you feel the pressure of a Medicine degree would probably be too much for you.

Action Steps

- Consider A-Levels: attend Sixth Form open evening in October to gather information about A level courses and discuss potential for A level study with teachers. Attend a taster lesson in Psychology as this is a new subject offered in the Sixth Form. Taster lessons take place in the week before half term.
- Research careers: during the remainder of this term undertake some research into healthcare careers, using the resources and links on the Morrisby website.
- Organise work experience: arrange a work experience placement, in one or two of the researched careers, in the summer after GCSE exams. Check the local NHS Trust website to see if there's a work experience scheme to apply to and/or ask family/friends for relevant contacts. Then send an updated CV and covering letter to appropriate organisations. You mentioned that you have an aunt who is a trained pharmacist who lives at some distance from you. I recommend you have an initial conversation with her about a career in pharmacy and if feasible arrange some work shadowing through her.

Your account on Morrisby.com contains a great many resources to help you plan your future. You can login whenever you wish. If you need additional help, please use 'Contact an Adviser' on the 'Support' section of your account.
